EDUCATION

The Ohio State University

Columbus, OH

Bachelor of Science in Computer Science, Minor in Math | GPA: 3.75

August 2023 – May 2027

- **Coursework:** Artificial Intelligence, Machine Learning, Data Structures & Algorithms, Low Level Programming, Data Mining, Database Systems, Operating Systems, Computer Networking, Software Development, Web Applications, Linear Algebra

TECHNICAL SKILLS

Languages: Python, Java, HTML/CSS, SQL, JavaScript/TypeScript, React

Tools & Libraries: FastAPI, Flask, SQLAlchemy, PostgreSQL, Node.js, Express.js, PyTorch, scikit-learn, Pandas, Alembic, AWS, MongoDB, Docker, Linux, Git, Jira, Slurm, Postman, SAM2, JUnit, PyTest, VSCode

EXPERIENCE

IBM

August 2026 - December 2026

Incoming Software Developer Engineer Intern

San Jose, CA

Capital One

June 2026 - August 2026

Incoming Software Engineer Intern

New York, NY

Idler (YC S25)

Jan 2026 – Present

Problem Design Engineer

Remote

- Designed and evaluated real-world software engineering reasoning tasks by extracting and documenting expert debugging and refactor workflows from production codebases to train large language models on long-horizon problem solving

Imageomics Institute

Sep 2025 – Jan 2026

Computer Vision Research Assistant

Columbus, OH

- Co-developed BALLER120 for CVPR 2026, a curated dataset of **4,500+ free-throw sequences from 120 NBA players**, resulting in **9000+ appearance and silhouette clips** for controlled identity recognition research
- Built a full segmentation pipeline using Roboflow and SAM2, achieving **frame-accurate masks across 100% of clips**
- **Reduced manual film retrieval time by 10 hours a week** by developing a Python script using the NBA API
- Designed reproducible HPC workflows on OSC's A100 systems using PyTorch and FlashAttention, ensuring stable GPU memory usage, faster batch processing, and consistent job scheduling through Slurm

Blue Cross Blue Shield

Jun 2025 – Aug 2025

Software Engineer Intern

Chicago, IL

- **Saved 90 hours and \$52K annually** by optimizing ingestion, cleaning, normalization of cohort data with Python and Pandas
- Designed scalable MongoDB schemas and REST APIs using FastAPI to optimize query performance, **reducing reporting delays from 1 week to same-day** and **enabling cross-region self-serve access to 3K+ records**
- Containerized data pipelines using Docker, creating reproducible environments and deployment workflows on AWS

The Ohio State University

Sep 2024 – Present

Introduction to Java Teaching Assistant

Columbus, OH

- **Assist 40+ students each semester** in Introduction to Java during lab sessions **2 times a week**
- Hold weekly office hours providing constructive criticism for **over 50 homeworks, labs, and project assignments**
- **Improved student grades by an average of 3% each semester**, reflecting effective teaching methodologies

PROJECTS

Spotted Lanternfly Predictor | Python, Pandas, NumPy, Plotly

- Developed a spatial-temporal prediction model forecasting Spotted Lanternfly infestation spread across **17 Ohio counties**
- Engineered a composite ecological risk scoring system for **22 host tree species** by weighting abundance rankings against species-specific sensitivity data, identifying Maple as the highest-risk species
- Estimated a **\$38.7M annual economic impact** to the Columbus region via geospatial modeling and scaled economic-loss calculations derived from Pennsylvania historical data (2014-2020)

LEADERSHIP & INVOLVEMENT

Sponsorship Lead

Sep 2024 – Sep 2025

OHI/O

Columbus, OH

- Lead networking with **100+ companies annually**, raising **over \$115,000** throughout the year for all OHI/O events
- Direct financial planning, allocating funds across programs and club operations for members and **2600+ CSE students**
